**Curriculum
PEDAGOGY AND EDUCATIONAL
SCIENCES**

The curriculum of Pedagogy and Educational Sciences is integrated with the area of pedagogical and educational research in relation to human biopsychic, social and cultural development and with the contexts of education and person-centred care for the entire course of life. A specific focus is, indeed, reserved to training problems understood as a dynamic and continuous process in the perspective of lifelong and life wide learning; lifelong education understood as a socioculturally placed area of practice; educational practices and teaching methodologies functional to the promotion of processes of social inclusion and intercultural integration; formal, informal and non-formal contexts of education, instruction and training: school, university, family, peer group, workplaces, spaces for political, social, cultural, religious participation; the training of education, care and training professionals in school, university and extracurricular, professional and entrepreneurial contexts, etc.

Curriculum PSYCHOLOGY AND DEVELOPMENTAL AND LEARNING SCIENCES	The curriculum of Psychology and Developmental and Learning Sciences is integrated with the area of psychological research on learning, with specific reference to the issues of learning difficulties and disorders, emotional and motivational learning aspects, the effects on socio-economic and cultural disadvantage learning conditions and minority bilingual conditions. Particular attention will be paid to the study of the effects of emergency events on learning, with special attention to the variables related to the school, family and entrepreneurial settings and their impact on the cognitive, affective and relational components of learning, through a comparison between neurophysiological and behavioral patterns.
