Scientific and professional activity. Academic qualifications and other qualifications

- Specialized in "Forms and methods of evaluation", annual course – University of Bari (1995/96)
- Specialized in "Methodology and teaching", annual course – University of Bari (1994/95)
- PhD in Statistics – Faculty of Economics, University of Bari (03/10/1994) – "The index numbers for the territorial comparison of economic aggregates". Coordinator Prof. M. Chieppa, Tutor Prof. C. Cecchi.
- Graduated in Economics – University of Bari (28/06/1990)
- Researcher in Statistics – Department of Economics, University of Foggia
- Adjunct Professor of Statistics – Department of Economics, University of Foggia

Scientific discipline

SECS/S01A – STATISTICS

Main research interests

The main research interests are the methodological issues relating to the statistical evaluation of the quality of services; Application of multivariate statistical tools to identify and measure specific economic-social-environmental phenomena. The main research topics concern quantitative techniques capable of providing gross multidimensional indicators for the evaluation of the quality of services (university, social and otherwise): new procedures have also been tested and comparatively evaluated in alternative operating contexts (economic, financial, healthcare, etc.). For similar purposes, statistical methodologies have been developed to identify risk factors in the healthcare sector. Particular attention was paid, for example, to emergency/urgent healthcare transport systems 118 and optimal allocation of human and instrumental resources. A new area of interest is the new legislation on Renewable Energy Communities (CER) in order to formalize an algorithm to distribute incentive contributions and to identify risks indicators of these new renewable energy development tools.

University teaching activity (last four years)

- Professor of *Statistics*, Department of Economics, University of Foggia (2020/2021 – 2021/2022 – 2022/2023 – 2023/2024).
